A.1.1 COMMITMENT TO SAFETY AND SECURITY

ORM-HS 1.2.1

For all of us here at Ultra Aviation Services, our first and foremost priority is the safety and security of our customers and our colleagues. We strive to be the world leader in safety, and rely on the sound judgment and experience of our team members to accomplish this goal. Safety is the primary consideration in any decision and is a key measurement in the success of our company.

A program of safety awareness along with the ability to establish comprehensive safety policies and ensure compliance with those policies is essential to any company's successful operation. Most accidents occur when there is a failure to comply with established policy and procedures. Poor safety awareness, compliance failure, carelessness or neglect may result in serious injury or loss of life as well as damage to equipment and loss of revenue.

The corporate safety and compliance department has the primary responsibility for oversight and assessment of the company, reporting the results of its independent assessment and audits of safety and performance directly to the President and the Director of Operations.

The implementation of the company Safety Management System and Quality Assurance Program promotes a culture of safety and security and provides a structure for the continuous improvement of the management system at all levels of the organization. To ensure continuing relevance, the corporate risk management policy is normally reviewed for possible update a minimum of every two years.

The safety and security of our customers and team members is and will remain our top priority.

RAUL R. DUBE
PRESIDENT / C.E.O.

A.3.3 DIRECTOR OF HUMAN RESOURCES & ADMINISTRATION

- The Director of Human Resources and Administration reports directly to the President.
- The Director of Human Resources will be well-versed in each of the human resources disciplines – compensation and benefits, training and development, employee relations, and recruitment and selection.
- Responsible for the recruitment of qualified personnel as established by the Director of Operations.
- Duties and Responsibilities to include:
 1. **Compensation and Benefits** - Responsible for the development of strategic compensation plans, alignment of performance management systems with compensation structure and negotiations for group health care benefits.
 2. **Training and Development** - Responsible for establishing Employee training curriculum and evaluation. Employee training and development includes new hire orientation, leadership training and professional development workshops.
 3. **Employee Relations** - Responsible for preserving the employer-employee relationship through designing an effective employee relations strategy. An effective employee relations strategy contains specific steps for ensuring the overall well-being of employees. It also ensures that employees have a safe working environment, free from discrimination and harassment. This includes conducting workplace investigations and resolution of employee complaints. The Human Resource Director may also be the primary contact for legal counsel in risk mitigation activities and litigation pertaining to employee relations matters.
 4. **Recruitment and Selection** - Responsible for the development of strategic solutions to meet workforce demands and labor force trends. The strategy might include developing an incentive program or providing cross-training so employees can become certified in different specialties to become more valuable to the organization.
 5. **Company Employment Policies** - Responsible for establishing and enforcing company policies regarding employment.

Section: A Organization and Management

Revision: 6
Date: 10/01/2021**A.4 COMMUNICATIONS****ORM-HS 1.5.1**

An effective communication system is necessary to ensure the exchange of operational information among senior managers, operational managers and front line personnel. The communication system includes company personnel, customer airlines, regulatory agencies, and third-party organizations.

Any changes relevant to the conduct of ground operations, operational responsibilities, performance, along with any changes instituted in conjunction with customer airlines and/or relevant authorities, will be communicated in document form to the departments involved, the change(s) that are to be communicated by bulletin number referring to date and sequence of change(s), action, date required, expected completion date and

These bulletins or policy changes will be issued as soon as feasible via company email, memo, text messages, mail or face to face meetings with Station Manager acknowledging receipt via email, memo, text messages, mail or face to face meeting, ground to air radio and advise when actions have been completed.

Manual amendments are issued based on revision schedule to incorporate changes as required. Amendments will always include a revised List of Effective Pages in addition to the revised pages. Revisions shall be recorded below and inserted according to the instructions on the Revision Summary.

A.5 EMPLOYEE COMMUNICATIONS POLICY GUIDELINES

The Exchange of Meaning - Communication is the effective exchange of meaning or understanding in formal and informal communication. It applies to communication up, down and across the organization. Everyone in the organization is accountable for the effectiveness of his or her own communication. This especially applies to those who manage others.

A.5.1 OPEN COMMUNICATION

At Ultra, our management believes open communication is critical to understanding and meeting our team member's needs. Through our "open door" policy, team members (employees) are free to share suggestions, ideas and voice concerns, whether it's help with a problem, guidance or direction, or simply getting an answer to a question.

This means that managers will treat all discussions fairly, with an open mind and without bias. They will maintain complete confidentiality, whenever possible. They will work with you to mutually resolve any issues or problems you may have.

As an Ultra team member, you may speak to your lead, supervisor or Station Manager at any time with suggestions, questions or concerns that you may have. If you feel that you need to go outside of your station or did not have your issue resolved, you may also contact the Manager of Safety and Compliance, the Director of Human Resources, or the Director of Operations. See the company contact sheet for contact

Section: A Organization and Management

Revision: 6
Date: 10/01/2021

Ultra is committed to the key value of open communication. Unless something is commercially confidential, it can be communicated in a complete, unambiguous and timely manner. The credibility and trust of managers will only come with consistently truthful and open communication. Care should be taken to decide what requires formal communication and by whom, and what can be communicated informally.

Communication within the company should be conducted in the following ways:

1. **Verbal Communication** - One of the most effective ways to communicate is to discuss instructions and information verbally. This presents the opportunity for questions to be asked and answers to be received. This is conveyed best in face-to-face communication, but can also be accomplished by telephone or radio. Verbal communication includes Lead Agents, Supervisors, Managers and Director briefings and discussions as appropriate.
2. **Written Communication** is most effective when communicating changes in company policy or procedures. This allows for documented acknowledgement of the communication and a way to reference back to the communication for verification of meaning and contents.
3. **Feedback** - Obtaining feedback and listening effectively are critically important for good communication. Effective communication will only come if communicators at all organizational levels seek out feedback and take appropriate action to ensure the intended meaning is passed on. Ultra is committed to acting on feedback, either with clarifying communication or relevant action.
4. **Training** - A well defined and complete training program is essential for clearly defining duties and responsibilities along with the performance standards necessary to perform those duties safely and in compliance with all regulatory requirements.
5. **Leadership** - Effective team leaders regularly communicate with their team members on a formal and informal basis, and actively seek feedback from their teams on the effectiveness of their communication with them. Unless told otherwise, managers are authorized to communicate. Communication about significant happenings needs to be thoroughly planned. Important information must be made available to team leaders in a timely manner to enable them to relay it to their teams. Information should be cascaded down the organization and communicated direct to team leaders as appropriate.
6. **Individual Communication** - All communication must be truthful and ethical. The impact and consequences of communication determined in advance must be taken into account. The effective communication of job requirements, standards and oversight is a key element of keeping personnel aware of their individual performance so that there are no surprises when individual evaluations are conducted. Information provided to any one person should be also provided at the same time to all others involved or likely to be interested. Mischievous communication (e.g. starting or spreading rumors known to be untrue) should not be tolerated.

Section: A Organization and Management

Revision: 6
Date: 10/01/2021

A.5.2 DISSEMINATION OF SAFETY INFORMATION & ALERTS

ORM-HS 1.3.12

The Manager of Safety and Compliance will use the following means of communicating to Company personnel in order to ensure that information from the safety risk and mitigation program and the safety assurance program is communicated to management and non-management personnel throughout the organization to maintain an awareness of the SMS and current operational safety issues:

- An electronic safety alert will be sent via email to all Station Managers and Directors at all Ultra facilities of any and all urgent safety notices.
- Any significant safety issues, including any items from the quality assurance program will be covered during the regularly scheduled meetings or conference calls.
- Direct phone call to responsible or urgent need to a specific person or station of any urgent safety information.
- All Safety Alerts will include information from the quality assurance program to ensure awareness of compliance with regulatory and other requirements
-

Section: A Organization and Management

Revision: 6
Date: 10/01/2021**A.6 MANAGEMENT REVIEW PROCESS****ORM-HS 1.4.1, 1.4.2, 1.4.3,**

An Management Systems review is a necessary element of a well-managed company and provides a process through which organizational control and continuous improvement can be delivered. **Ultra Senior management shall review and evaluate all areas of operations on an annual basis.** Some areas may be evaluated more often if necessary. During the planning and/or review management must ensure the allocation of equipment and resources and to ensure they are sufficient to meet internal operational safety and security requirements. The review shall include compliance with all clients, governmental and /or local authority regulations and requirements.

During the annual review senior management will engage in a general assessment of the management system to ensure all defined elements are functioning effectively. The review should include an assessment of operational performance to ensure the management system is producing the desired operational safety, security and quality outcomes.

Senior management ensures that deficiencies identified during the management review are addressed through the implementation of organizational changes that will result in improvements to the performance of the system.

The management review process includes, but is not be limited to the following areas:

1. Organizational Structure and reporting lines
2. Authorities, responsibilities, policies, processes and procedures
3. Safety Risk Assessment and Mitigation Program
4. Safety Assurance Program
5. Quality Assurance Program
6. Provision and allocation of resources
7. Operational feedback, processes, structure, and reporting lines
8. Incident and near-miss reports
9. Changes in regulatory policy or civil aviation legislation
10. Changes in company and/or customer airline policies or requirements
11. Process performance and organizational conformity
12. Performance Measures
13. Status of corrective and preventative actions
14. Follow-up actions from previous management reviews
15. Feedback and recommendations for management system improvement
16. Regulatory violations
17. Others as deemed necessary.

Management review is a formal process that shall be documented and the records and results retained. Additionally, the results of the management review process would include action plans for changes to be implemented within the system where deemed appropriate.

Section: A Organization and Management

Revision: 6
Date: 10/01/2021**A.7 PROVISION OF RESOURCES**

The recruitment of qualified personnel who poses the knowledge, skills, training, and experience for each position is the first step in building a team culture for safe and secure operations. Positions within the organization that affect operational safety and security are filled by personnel that possess the knowledge, skills, training, and experience appropriate for the position; and Personnel who perform operationally critical functions are required to maintain competence on the basis of continued education and training.

Ultra defines the criteria for each position by job descriptions. Each job description should contain the following information:

- Title
- Department
- Description
- Pre-Requisites
- Required Training
- List of Duties
- Supervision

A.7.1 DRUG-FREE WORKPLACE POLICY**ORM-HS 1.2.2**

As a part of its commitment to safeguard the health of its employees, to provide a safe place for its employees to work, and to promote a drug free community, ULTRA AVIATION SERVICES, INC. has established this policy on the use and/or abuse of alcohol and/or other drugs by its employees.

Substance abuse, while at work or otherwise, seriously endangers the safety of employees, as well as the general public, and creates a variety of workplace problems including increased injuries on the job, increased absenteeism, increased health care and benefit costs, increased theft, decreased morale, decreased productivity, and a decline in the quality of products and services provided. ULTRA AVIATION SERVICES, INC has established this policy to detect and remove abusers of alcohol and/or other drugs. It is also our policy to prevent the use and/or presence of these substances in the workplace and to assist employees in overcoming any dependence on alcohol and/or other drugs in accordance with the following guidelines.

The exercise of duties while under the influence of psychoactive substances is **prohibited**. Failure to comply with this policy may result in termination of employment with Ultra Aviation Services Inc.

NOTE: Please refer to Section O of this manual for the company Drug-Free Workplace Policies and Procedures.

Section: A Organization and Management

Revision: 6
Date: 10/01/2021**A.8 RISK MANAGEMENT****ORM-HS 1.3.4**

1. The risk management policy of Ultra Aviation Services is to ensure the successful delivery of its business through the effective management of risk by adopting best practice in the identification, evaluation and cost-effective control of risks to ensure that they are eliminated or reduced to an acceptable level.
2. All employees should understand the nature of risks and risk management at Ultra. Those with the necessary authority must further accept responsibility for risks associated with their area of work, although it is understood that some risks will always exist and cannot be eliminated. Senior management will provide the necessary support and is committed to risk management.
3. Ultra's risk management strategy's objectives are to ensure:
 - Hazards with the potential to affect operational safety or security are identified through an operational risk assessment;
 - Threats with the potential to affect security are identified;
 - Hazards are analyzed to determine risks;
 - Risks are assessed to determine the need for control;
 - Risk control actions are developed and implemented in operations, and are subsequently monitored and measured to ensure validation of their effectiveness and to ensure risks are controlled.
4. These objectives will be achieved by:
 - Establishing a Safety Committee at each location, and having available the voluntary "Hazard Reporting" document, which will allow any employee to report a hazard or safety concern.
 - Reinforcing the importance of effective risk management as part of the everyday work of employees
 - Providing opportunities for shared learning on risk management across the company, by the allowing employees to report safety or risk concerns directly to local and senior management.
 - Incorporating risk management considerations into our internal audits
 - Maintaining documented procedures for the control of risk and suitable information
 - Maintaining appropriate reporting and recording systems, with investigation procedures to establish cause and prevent recurrence (IPG)
 - Preparing or instigating the preparation of contingency plans, for areas where risks could have a catastrophic effect on the business continuity of the company
 - Maintaining effective communication with all areas of management within the company.
 - Monitoring the plan on an ongoing basis.

NOTE: See Section C of this manual for information on the Safety Management System.
