B.1 DOCUMENTATION SYSTEM**ORM-HS 3.1.1**

Ultra Aviation Services has created and maintains a version controlled system of company manuals and documentation to be used directly in the conduct or support of ground operations. This system of manuals is reviewed, revised and maintained by the Director of Operations, and is to be used in conjunction with the airline customer's system of manuals, in order to ensure safety, security, quality, currency and compliance with all regulatory agencies, relevant documents and/or data.

The Ultra Aviation Services documentation system consists of the following company manuals:

1. General Operations Manual

An electronic system of document management and control is maintained on the company intranet. The identification and allocation of document access and modification rights will be performed by the Director of Operations and implemented by the information technology department. Other than the company controlled copies at the principal base of operations and at each station, any information or data that is downloaded or otherwise extracted (e.g. printed on paper) from the electronic files becomes uncontrolled and considered obsolete.

B.1.1 DOCUMENT CONTROL**ORM 3.1.2**

The Master copy of the General Operations Manual will be maintained by the Director of Operations and kept at the principal base of operations.

The procedures and policies contained in this manual are designed to supplement the company's policies and procedures in compliance with regulatory agencies and in line with customer airline policies and procedures and are considered essential to good operating practices and safety.

A hard copy or electronic copy of this manual, or appropriate portions of the manual, will be furnished or accessible to all areas of responsibility within the Company in accordance with the distribution list, including, but not limited to:

- Office File (Master Copy)
- Each Company Station
- Company Intranet

A **BACKUP COPY** of Source files, supporting data and the electronic system of document management shall be generated to an external location on a quarterly basis and whenever a revision is published.

When a hard copy of this manual is distributed, the station manager or applicable person will sign for receipt.

B.1.2 PUBLICATION AND REVISION**ORM-HS 3.1.1**

- Company manuals and documents shall be created and maintained under the direction of the Director of Operations, and published as follows.
 1. Initial Draft Created
 2. Review of Draft by the Director of Human Resources, Each Station Manager and Manager of Safety & Compliance and General Council, if necessary.
 3. Feedback Reviewed and Incorporated if relevant.
 4. Copyediting (checking organization, grammar, syntax, spelling, accuracy, consistency, style, etc.),
 5. Content Approval
 6. Conversion to electronic form.
 7. Publication to the Company Intranet.
 8. Notification of Revision Sent throughout appropriate areas of the company, including all applicable stations and appropriate external service providers that conduct outsourced operational functions.

- **Manual Revision**

Each manual holder will be responsible for keeping his/her manual up to date as revisions are furnished. The Station Manager will be responsible for keeping office copies up to date. Formal revisions to this are issued by the Director of Operations. Each formal revision will be accompanied by a new List of Effective Pages.

Revision control is accomplished in the upper part of each page. The following is an explanation of the terms found:

Company Name	Ultra Aviation Services, Inc
Manual Name	Represents the name of the company manual
Section Letter	Represents the Indexed Section of the Manual
Section Sub-Header	Represents the topic of the Section
A-1	Represents Section A, Page 1.
Revision: 8	Represents Revision Number.
01/01/2014	Represents the effective date (Month/Day/Year) of the revision.

- **Revision Control**

All revisions to this manual will be issued a revision number. This number, along with the effective date, will appear on each revised page. A record of revisions will be maintained in each manual. This record will require the entry of the revision number, date revision was accomplished, and initials of the individual who accomplished the revision.

Section: B

Documentation and Records

Revision: 6

Date: 10/01/2021

- **Revision Letter**

Each revision to Company Manuals will be issued with “Revision Letter” attached. This letter will contain specific instructions for the accomplishment of the revision. These instructions will appear in the “Action” column of the letter. The codes are as follows:

R= Remove and Replace the affected page

D= Delete Destroy the affected page

N= Insert new page

The “Remark” column of the “Revision Letter” will give a brief description of the revised material. The “Revision Letter” will be completed by the person accomplishing the revision in each manual. The completed “Revision Letter” will be returned to the Director of Operations. It will be the responsibility of the Director of Operations to assure that all “Revision Letter” are returned in a timely manner to ensure revisions to all manual have been accomplished.

B.1.3 EXTERNAL DOCUMENTATION**ORM 3.1.1**

Documentation received from external sources would include manuals and other types of relevant documents that contain material that is pertinent to the safety of operations conducted by the operator (e.g. regulations, operating standards, technical information and data).

IATA Guidance Material

For additional guidance please refer to the following IATA Manuals.

Required:

- Current Dangerous Goods Regulations (DGR)
- Airport Emergency Response Plan (ERP)
- Customer Airline Documentation

Optional (if applicable to normal operations):

- Airport Council International Airside Safety Handbook (ACI)
- Live Animal Regulations (LAR)
- Perishable Cargo Regulations (PCR)
- ULD Regulations (ULDR)
- IATA Security Manual (SM)
- Airport handling Manual (AHM)
- IATA Ground Operations Manual (IGOM)

Instructors shall receive updates to the Regulations and Necessary Training Materials on an annual basis.

B.2 OPERATIONAL MANUALS**ORM-H 3.2.1**

Ultra Aviation Services maintains this General Operations Manual containing the Company's operational Policies, Procedures, instructions and other guidance or information necessary for ground handling personnel to perform their duties and be in compliance with applicable regulations, laws, rules, requirements and standards. This manual shall be accessible to all operational personnel in a usable format at all stations.

NOTE: Refer to the appropriate section in this manual for specific guidance, policies and procedures for performing assigned duties.

B.2.1 OUTSOURCING

In the event that ground operations and/or associated functions are outsourced to an external ground service provider, Ultra shall make available to the provider each operational or procedural manual(s) relevant to the type(s) of outsourced ground operations conducted.

B.3 RECORDS SYSTEM**ORM-H 3.3.1**

Ultra Aviation Services maintains operational records, compliance checklists and training records for each flight operation and each employee in accordance with applicable regulations, laws, rules, requirements and standards of IATA, ICAO, the FAA and the Customer Airline.

Identification - Each company manual is identified by name, and each active page is identified by section, title, revision number and revision date.

Legibility - Company Manuals and Records are written in International English in accordance with IATA policy.

Maintenance - Company Manuals are Maintained and Revised under the direction of the Director of Operations.

Retrieval - Company Manuals are available for reference on the company intranet.

Protection and Security - Each company manual is maintained and secured by the person who it is issued. Access to electronic copies is password protected.

Disposal, Deletion, Archive - Company Records and Manuals are maintained by each station and are disposed of according to the customer airline requirements. If there is any question as to how, when or if to dispose of any company manual or records, please consult with the Director of Operations.

* Expiration Date Plus 12 Months

Initial and last 2 recurrences

B.4.2 OBSOLETE/DISPOSAL OF HARD COPY DOCUMENTS

The information that is no longer in use or current and has been published in a document controlled document is considered obsolete. For those obsolete or outdated publications on hard copy paper, at the time of receiving a new revision, must proceed as follows:

- 1) Old copies or formats, should be removed from the manual; and
- 2) be shredded entirely
- 3) New pages must be inserted and revision control record up-dated

If a shredder is not available, the document may be cut into strips with scissors.

B.4.3 OBSOLETE/DISPOSAL OF ELECTRONIC DOCUMENTS

If the revision is electronic, the document will be direct up-date to the intranet system. If employees have downloaded a document to his laptop, he must delete the file, and afterward delete it from the electronic recycle bin file also. This same procedure applies to extracts or partial copies of this manual.

B.4.4 OBSOLETE/DISPOSAL OF CDs

When the information is handling via Compact Discs, the obsolete disk must be brake and damage the tracks.

B.5 REVIEW OF DOCUMENTS

When procedures, regulations, customer airline procedures, equipment modification, new equipment, new services and operation is added in the system, weakness on procedures identified from the quality system and voluntary report system, the current information needs to be review and modified in accordance with the new requirements. The safety department must evaluate and conform the change.

B.6 AIRLINE CUSTOMER MANUALS

The Airline Customer manual have to be available during the operation of the flight. When a new revision comes or a new airline customer provides the manual, the Safety and Training Manager will have access to the information and proceed to review the existing procedures. He will incorporate any necessary change in Ultra's Training Program and will edit the airline customer manual table in chapter 2. Safety and Training Manager will also coordinate the recommendations and amendments required in the GOM. Once the changes are made, after approval, the manual will be distributed to the users.

B.6.1 CUSTOMER MANUAL MANAGEMENT PROCEDURE

Communication and cooperation with the customer airline is essential maintaining access to their ground services manuals.

1. Contact the customer airline representative by phone or email to request access to their operations manual.
2. There are a few ways they may respond:
 - **Online Version (Controlled)** - Access credentials will be provided to the ground handler. This version of the manuals will always be controlled and current.
 - **Physical Book or CD (Controlled)** - A physical copy of the manuals will be sent to the ground handler and confirmation of distribution must be returned to the carrier and a copy retained by the company.
 - **PDF Version** - Once a manual is downloaded it is no longer considered to be controlled and so will only be valid for 1 day from the time of download from a controlled source. If this is the way that the customer airline chooses to provide the manual, then the carrier must provide a representative that will always have access to the controlled version of the manuals during an operation.
 - **OTHER** - If the manuals are provided in another way, conduct an assessment of the manual to verify that access to a controlled version of the manuals is provided.
3. The Quality Assurance Department will maintain a table to document the manner in which each customer has provided access to their manuals, and periodically check access to customer manuals is
4. This item will be included in the Annual Quality Assurance Audit and verified in the annual upper management meeting.
