E.1 TRAINING PHILOSOPHY

Ultra Aviation Services training courses were established to provide training for our staff of aviation services employees at Miami International Airport. We provide initial and advanced training that upholds our commitment to a culture rich in safety, security and competence.

Entrusted with the responsibility of detecting potentially threatening situations, materials, and outcomes, today's airport security staff must complete a rigorous course of training, which often entails a variety of factors, from general security awareness training (GSAT) to job specific training and operational standards and security.

With airport security regulations constantly evolving, the need for staff to be fully trained to deal with the versatile nature of ensuring passenger safety and personal job safety is of vital importance. A high level of security training, together with other intelligence gathering, is the best defense we have against mishaps, small and large. Training is essential to the safety and security of our business and clients. The importance of safety and operational training extends beyond a worker's introduction to the job. It also encompasses situations when his job changes or when working conditions change. Without a thorough understanding of safety practices, job specific standards, standard policies a worker will be at a higher risk for errors, for which there is little room in the aviation industry.

General and job specific training is given to all new hires before any operational duties are performed, by a company certified trainer using the standards of the company, customer airlines and regulatory requirements.

Initial and recurrent training includes evaluation or testing by written, oral or practical means. Recurrent training is completed on a specified frequency to ensure all personnel remain qualified to perform operational duties, according to the applicable regulations, but not less than once during every 36-month period.

The Training Program will be reviewed by the Quality Assurance Committee on an annual basis in order to ensure that the program is updated and that remains operationally relevant and in accordance with the requirements of the customer airlines.

The Quality Assurance Committee may recommend changes to the Training Program, through a Change Management review process or as a result of conducting an operational investigation.

E.1.1 TRAINING PROGRAM AND QUALIFICATIONS**ORM-HS 4.1.1, 4.1.2, 4.1.3,
4.1.4, 4.1.5, 4.1.6, 4.1.8, 4.1.9**

- A.** The Company training program is designed to ensure that positions within the organization that affect operational safety and security are filled by personnel who possess appropriate knowledge, skills, training and experience.
- B.** This program requires that all personnel complete initial training prior to being assigned to perform operational duties and includes.
- Operational familiarization training to ensure operations are conducted in accordance with applicable regulations, standards and company requirements.
 - Safety Management System training.
 - Security Training
 - Additional Job Specific Training pertaining to the each applicable operational area.
 - Customer Airline Training, if applicable.
- C.** It is vital that company personnel maintain competence on the basis of continuing education and recurrent training. Recurrent training will be completed on a specific frequency according to the applicable regulation, but not less than once during every 36-month period. .
- D.** Any personnel who has not performed operational duties for an extensive period of time (1 year) shall be required to receive requalification training prior to returning to the active performance of duties.
- E.** Each course in this program will be comprised of classroom training and examination accompanied by practical on-the-job training where applicable.
- F.** The instructor for each course for ground handling personnel must be able to demonstrate that they are competent, qualified and, where required certified to conduct company training.
- G.** A record of training completion must be retained. for each employee for each course he/she has completed.
- H.** This training program will be reviewed periodically and updated to remain operationally relevant, current and in accordance with the customer airline(s).

E.3 SIDA TRAINING

SIDA (Security Identification Display Area) Training is given by the local Airport Authority.

E.3.1 SECURITY TRAINING

ORM 4.2.1

All personnel will complete a aviation security course which is in accordance with:

- The Security Program of the customer airline.
- The Requirements of the civil aviation security authority where ground operations are conducted.
- The Transportation Security Agency (TSA) in the United States.
- The Requirements of the airport authority at stations where ground operations are conducted.

The security training program will ensure that:

- Personnel employed by the company to implement security controls are competent to perform their duties.
- Frontline and appropriate aircraft ground operations and cargo personnel can act in the most appropriate manner to minimize the consequences of acts of unlawful interference and disruptive passenger behavior.
- General organization security awareness.

E.4 DANGEROUS GOODS TRAINING (DGR)**PAB 4.1.3, HDL 4.1.3, LOD 4.1.2**

This training covers ISAGO tables PAB-3, HDL-3, AGM-3, LOD-2

E.4.1 Dangerous Goods (HAZMAT Recognition)

- General Philosophy
- Limitation and procedures
- Label and Marking
- Recognition of Undeclared DG
- Provisions for passengers and crew
- Emergency procedures
- Airline Specific Procedures (as applicable)

The following topics will additionally be covered for Load Control and Aircraft Handling Personnel

- Lists of Dangerous Goods
- Storage and loading procedures
- Pilot In Command Notification (NOTOC)

Dangerous goods training will be conducted by either:

- An IATA member airline; or
- An IATA Accredited Training School (ATS); or
- A person or organization approved by the relevant authorities in states where operations are conducted.

Dangerous Goods Instructors are required to:

ORM 4.1.7 HDL 4.1.3

- Have adequate instructional skills and prior to delivering instruction, completed a dangerous goods training program that provides the knowledge in the subject areas consistent with the level of instruction being delivered.
- Conduct a minimum of one dangerous goods training course or attend recurrent dangerous goods training within the last 24 months.
- Receive Updates to the regulations from local and national authorities and to the training material on an annual basis, if applicable.
- Received requalification training, if applicable.

E.5 EMERGENCY RESPONSE

- What is an Emergency?
- Authority in Command
- Emergency Declaration
- Emergency Classification
- Spills
- Fire
- Security

Section: E

Training and Qualification

Revision: 6

Date: 10/01/2021

E.6 ORIENTATION AND BASIC SAFETY TRAINING

ORM 4.3.1 Table 1.2

- OSHA, PPE, Human Factors
- Company safety policy and program
- Employer/employee responsibilities
- Applicable regulations (international, state, local)
- Safe Working and operating practices.
- Reporting
- Open reporting culture.
- Personnel injuries
- Prevention

E.7 AVIATION SECURITY (AVSEC) GENERAL

- "Hitting the Target" Video (20 Minutes)
- PPBM/Bag reconciliation Video (20 Minutes)
- Aircraft Search Video (20 Minutes)
- "Secure Flight" _ Selectees, ID checks, BPPR, PPBM (30 minutes)
- Worldwide, Federal, Local authorities in charge of AVSEC (10 minutes)
- Our roll in AVSEC (20 minutes)
- EXAMS. AVSEC and Aircraft search with a passing grade of 80%

E.8 AIRSIDE SAFETY TRAINING

PAB 4.1.1, HDL 4.1.1, AGM 4.1.1

E.8.1 Safety Philosophy

- a. company safety policy and program
- b. employer/employee responsibilities
- c. Safe Working and operating practices.
- d. Reporting / Open reporting culture
- e. Protection & Prevention against personal injuries

E.8.2 Safety Regulations

- a. International aviation regulations
- b. State aviation regulations
- c. Airport airside regulations
- d. Safe working and operating practices

E.8.3 Hazards

- a. Vehicle movement
- b. Pedestrian movements
- c. Aircraft movements
- d. Jet engines
- e. Propeller-driven aircraft and helicopters
- f. Aircraft antennae and other protrusions
- g. GSE
- h. Aircraft fueling and fuel spills
- i. Adverse and seasonal weather conditions
- j. Night operations
- k. Working at height
- l. Runway Incursions
- m. Slips, trips, and falls
- n. Noise
- o. Manual handling
- p. Confined Spaces
- q. Office Equipment
- r. Display Screen Equipment (DSE)
- s. Violence (physical & verbal attack and public disorder)
- t. Lone Working

E.8.4 Human Factors

- a. Motivation and attitude
- b. Human behavior
- c. Communication skills
- d. Stress
- e. Ergonomics
- f. Effects of psychoactive substances (drugs and alcohol)
- g. Fatigue
- h. Time pressure
- i. Peer management pressure
- j. Situational awareness
- k. Teamwork

E.8.5 Airside Markings and Signage

E.8.6 Emergency Situations

- a. Reporting
- b. Injuries
- c. Security threats
- d. Spillage
- e. Alarms and emergency stops
- f. Fuel shut-offs
- g. Ground-to-flight deck emergency hand signals
- h. Fire
- i. Severe weather
- j. Aircraft stand emergency procedures

E.8.7 FOD Prevention

E.8.8 Personal Protection

- a. Personal protective equipment All Functions
- b. Occupational health and safety All Functions
- c. Musculoskeletal injury prevention All Functions
- d. Weather exposure All Functions

E.8.9 Accidents, Incidents, Near Misses

- a. Personnel injuries
- b. Damage to aircraft, GSE, facilities
- c. Reporting
- d. Investigation
- e. Prevention
- f. Cost of accidents, incidents
- g. Risk assessment

E.8.10 Airside Safety Supervision

- a. Creating an open reporting culture
- b. Performance monitoring
- c. Coordination of airside activities
- d. Workload management
- e. Decision making
- f. Planning

E.9 AIRSIDE DRIVERS TRAINING**PAB 4.1.1, HDL 4.1.1, AGM 4.1.1**

Training for this section is provided by the local Airport Authority and applies to positions only where needed in specific functions.

E.9.1 General

- a. Role and responsibilities of vehicle Operators
- b. Vehicle equipment standards
- c. Hazards of airside driving
- d. Reduced visibility procedures
- e. Accident and incident reporting procedures

E.9.2 Ramps (aprons), stands, and airside roads

- a. Familiarization with ramp layout, operational stands, vehicle corridors, airside roads, aircraft taxi lanes
- b. Airport rules, regulations and/or procedures pertaining to airside vehicle operations
- c. Procedures for crossing aircraft movement areas
- d. Pedestrian crosswalk rules

E.9.3 Maneuvering Area

- a. Identification of obstacle free areas, limited access areas
- b. Airport regulations and requirements
- c. Air Traffic Control
- d. Airport layout
- e. Maneuvering area driving
- f. Radio communication requirements and procedures
- g. Aircraft familiarization

Section: E

Training and Qualification

Revision: 6

Date: 10/01/2021

E.10 LOAD CONTROL FUNCTION TRAINING**LOD 4.1.1, LOD Table 1****E.10.1 General Weight and Balance Proficiency and**

- a. terminology, definitions of terms, operational codes, abbreviations:
- b. aircraft balance principles, consequences of improper aircraft loading

E.10.2 Aircraft Structural load limitations

- a. linear (running load) limitation, area limitation (spreader floors)
- b. limitation per compartment/section/ULD positions
- c. monocoque (combined) limitation, area limitation (spreader floors)
- d. missing restraints limitation

E.10.3 Unit Load Devices (ULD)

- a. IATA identification codes
- b. gross weight limitations, hold restraint requirements
- c. container/pallets build-up and tie-down limitations/rules
- d. tagging

E.10.4 Bulk Hold Loading

- a. Load spreading rules
- b. Load restraint rules: nets, tie-down, volume restraint

E.10.5 Load Sheet:

- a. computation, issuance, checking (electronic and manual modes);
- b. last minute change procedures

E.10.6 Balance tables/charts

- a. computation, issuance, checking (electronic and manual modes)

E.10.7 Loading Instruction/Report (LIR)

- a. designation and numbering of aircraft holds
- b. issuance and checking (electronic and manual modes)

E.10.8 Loading messages:

- a. reading and sending standard loading messages.

E.10.9 Airline Specific Procedures (as applicable)

Section: E

Training and Qualification

Revision: 6

Date: 10/01/2021

E.11 PASSENGER & BAGGAGE HANDLING FUNCTIONAL TRAINING

PAB 4.1.2 - Table PAB-2

- Passenger check-in policies and procedures
- Baggage check-in policies and procedures
- Manual check-in procedures
- Cabin seating considerations, to include exit row, special passengers
- Passenger boarding policies and procedures
- Cabin access door operation
- Boarding bridge operation
- Dangerous goods regulations, considerations and procedures
- Security regulations, considerations and procedures
- Load control consequences, coordination and procedures
- Handling and boarding of weapons and authorized persons carrying weapons
- Passengers requiring special handling
- Communication procedures (customer airlines, load control, authorities, others)
- Data protection and security
- Document protection and security
- Abnormal and emergency procedures (fire, dangerous goods, security, other)
- Health and safety
- Emergency response procedures
- Airline Specific procedures, as applicable

A. BAGGAGE HANDLING FUNCTIONAL TRAINING

- Baggage Handling procedures (identification, sorting, loading in ULDs)
- Manual baggage handling procedures
- ULDs. (designation codes, inspecting, loading, tagging removal from service)

Section: E

Training and Qualification

Revision:

6

Date:

10/01/2021

E.12 LOADING BRIDGE/ JETWAY

Loading Bridge Jetway Training is given by the local Airport Authority.

E.12.1 Aircraft Access Door Training

- a. Types of Access Doors
- b. Airline Specific Requirements

E.12.2 Passenger Boarding Bridge Training

- a. Standard operating procedures
- b. Bridge control system, including emergency switches, cut-offs and buttons
- c. Out-of-limits procedures (for returning bridge to normal working limits)
- d. Back-off procedures and application
- e. Manual wind-off procedures
- f. Accident and incident response procedures
- g. Accident and incident reporting procedures (airport, provider)
- h. Fire procedures (bridge or aircraft)

E.13 CUSTOMER AIRLINE SPECIFIC TRAINING

Any additional training or differences required by the customer airline will be provided by that customer airline.

Section: E

Training and Qualification

Revision:

6

Date:

10/01/2021

E.14 INSTRUCTOR TRAINING

Instructors must have a minimum of the following requirements to be a trainer:

- High School Diploma
- No Less than 2.5 years of experience in ramp handling operation
- Current with ramp training, dangerous goods and human factor training.
- Have taken the auditor training.
- Conclude successfully 3 OJT's audits
- When he is practicing the auditor capabilities he can be part of the group
- Aviation internal auditor (internal provide).

Instructor will have a initial training for instructor techniques and knowledge of the training material that he is instructing.

Instructor will be current if at least he implements training in a period of 12 month. If not then attempts a training in 24 month

Evaluator will be current when the trainer conducts an audit in a flight in which the evaluator is working as a Supervisor. The evaluator most signs the audit.

E.15 AUDITOR TRAINING

Auditors must have a minimum of the following requirements to be a trainer:

- High School Diploma
- No less than 2 Years of experience in the airport operations
- Current with the applicable training, dangerous goods and human factor training.
- When he is practicing the auditor capabilities he can be part of the group audited.
- Aviation internal auditor training
- Complete 3 successfully OJT's audits.

Section: E

Training and Qualification

Revision: 6

Date: 10/01/2021

E.16 AIRCRAFT HANDLING AND LOADING**HDL 4.1.2 - Table 2**

Training for personnel with aircraft handling duties and/or responsibilities shall address the following subject areas, as appropriate to assigned operational functions:

- Irregularity/incident/accident reporting procedures.
- Manual handling of load
- Safety during aircraft fueling
- Principles of aircraft loading
- Handling of Loads that require special attention
- Loading Incompatibilities
- Handling of ULDs
- Operation of aircraft loading systems/securing of ULDs
- Identification/consequences of malfunctions of in-plane loading systems.
- Consequences of load damage and spillage
- Positioning and operation of loading and servicing equipment
- Load notifications to pilot-in-command.
- Passenger embarkation/disembarkation procedures.
- Standards of aircraft cleaning, lavatory and potable water servicing
- Aircraft movement operations
- Airline Specific Procedures (as applicable).

E.16.1 RAMP PROCEDURES TRAINING

- a. Job description and responsibilities
- b. Personal Protective Equipment (PPE)
- c. FOD prevention/ Accident prevention/ Human factor
- d. Fire safety
- e. Safety Management System
- f. Ground Support Equipment (GSE)- General knowledge
- g. Marshalling Plans
- h. Hand signals
- i. Communication
- j. Written test passing grade 80%

Section: E

Training and Qualification

Revision:

6

Date:

10/01/2021

E.16.2 REGULATED GARBAGE

- a. Definition and applicable regulations
- b. No Free Ride video
- c. Company SOP discussion
- d. Cleaning and disinfectant procedures
- e. Written test passing grade 80%

E.16.3 RAMP ON-THE-JOB TRAINING (OJT)

Once New hire candidate has completed his/ her classroom training he/ she will commence the two (2) weeks of OJT, in which he/ she will be introduced to all the activities related to the corresponding job classification. At the end of this period Ramp Manager and Supervisor will evaluate if agent is in need of further OJT or classroom training to be left alone to perform job duties.

Agents that are not in need for further classroom and or practical training will be set up to attend the Airport Authority's AOA Driver's Training (DT) certification class.

E.16.4 GROUND SERVICE EQUIPMENT TRAINING**AGM 4.1.3**

- a. Safety
- b. Walk-around
- c. Maintenance
- d. Reporting
- e. Types of Ground Service Equipment
 - Motorized
 - Tractor / Tug
 - Belt Loader
 - Paymover
 - Lavatory Truck
 - Water Truck
 - ULD Loader
 - Golf Cart
 - Passenger Stair Truck
 - Non-Motorized
 - Ground Power Unit (GPU)
 - Air Conditioner Unit (ACU)
 - Air Start Unit (ASU)
 - Lavatory Cart
 - Water Cart
 - Tow Bar
 - Ramp Light
 - Passenger Stairs

Section: E

Training and Qualification

Revision: 6

Date: 10/01/2021

E.17 AIRCRAFT GROUND MOVEMENT**AGM 4.1.2**

Training for personnel with assigned duties and/or responsibilities in aircraft ground movement operations shall address the following subject areas as applicable to assigned operational functions:

- i. Aircraft Ground Movement Operations:
 - a. scope of operations;
 - b. principles, responsibilities;
 - c. practices, procedures
 - d. hazards, risk assessment;
 - e. safety precautions.
- ii. Operation of equipment:
 - a. nose gear towbar tractor
 - b. nose gear Towbarless tractor;
 - c. main gear tractor
 - d. towbars
- iii. Equipment-aircraft connect and disconnect procedures.
- iv. Aircraft Ground Movement Operations:
 - a. nose gear controlled pushback and towing operations;
 - b. main gear controlled pushback operations, if applicable;
 - c. powerback operations, if applicable;
- v. Aircraft Ground Movement Standard Hand Signals (ground-flight deck, ground-ground)
 - a. nose gear controlled pushback and towing operations;
 - b. main gear controlled pushback operations, if applicable;
 - c. powerback operations, if applicable;
 - d. power-in and power-out operations, as applicable;
- vi. Aircraft Marshalling:
 - a. scope of operations, principles, responsibilities;
 - b. practices, procedures
 - c. standard hand signals;
 - d. use of aircraft parking guidance systems, as applicable;
- vii. Aircraft Ground Movement Assistance:
 - a. scope of operations, principles, responsibilities;
 - b. practices, procedures
 - c. standard hand signals;
- viii. Airlines Specific Procedures (as applicable)

E.18 CARGO AND MAIL HANDLING

Ultra does not currently perform this function.

Section: E

Training and Qualification

Revision:

6

Date:

10/01/2021

E.19 AIRCRAFT LOADING SUPERVISOR TRAINING**ORM 5.4.1, Table 1.13**

Training for personnel assigned to supervise aircraft loading operations should address the following subject areas:

- i. General weight and balance proficiency and awareness:
 - a. terminology, operational codes, abbreviations;
 - b. aircraft balance principles, consequences of improper aircraft loading.
- ii. Aircraft structural load limitations:
 - a. basic knowledge of containerized holds resistance (relationship between missing or damaged restraints and ULD gross weight
 - b. area limitation (spreader floors);
 - c. limitation per compartment/section/ULD position;
 - d. monocoque (combined) limitation;
 - e. cumulative limitation;
 - f. missing restraints limitation.
- iii. Unit load devices (ULDs):
 - a. tie-down limitations and rules;
 - b. rejection criteria for damaged ULD and tie-down accessories;
 - c. tagging.
- iv. Bulk hold loading:
 - a. physical loading rules concerning baggage, cargo and mail;
 - b. tie-down and spreader floor procedures;
 - c. utilization of nets.
- v. Loading Instructions/Report (LIR):
 - a. designation and numbering of aircraft holds;
 - b. utilization of the LIR document.
- vi. Loading messages:
 - a. reading standard loading messages for off-loading of holds.
- vii. Dangerous goods:
 - a. cargo IMP codes;
 - b. ULD and parcels labelling and marking;
 - c. loading compatibilities;
 - d. onboard accessibility;
 - e. rejection criteria;
 - f. emergency procedures.
- viii. Other special loads (e.g., perishables, EAT AVI WET OBX, LHO):
 - a. cargo IMP codes;
 - b. marking and labelling;
 - c. loading compatibilities.
- ix. Positioning and operations of loading equipment:
 - a. areas of aircraft susceptible to damage by ground support equipment;
 - b. recording and reporting of damage to aircraft caused by ground support equipment.
- x. Operation of aircraft loading systems:
 - a. opening and closing of aircraft hold doors;
 - b. In-plane loading systems;
 - c. ULD automated and hand-operated restraints;
 - d. Operator's hold configurations and layouts.
- xi. Airline Specific Procedures (as applicable)

Section: E

Training and Qualification

Revision: 6

Date: 10/01/2021

E.20 SAFETY MANAGEMENT SYSTEM (SMS) TRAINING**ORM-HS 4.3.1 TABLE 1.4**

This course applies to personnel with assigned duties in the Safety Management System.

- i. Safety Risk Assessment:
 - a. Management of safety reports;
 - b. Hazard Identification.
 - c. Hazard Analysis
 - d. Safety Risk Assessment
 - e. Safety mitigation and risk management
 - f. Development of safety action plans.
- ii. Safety Assurance
 - a. Development of safety performance indicators;
 - b. Safety performance monitoring and measurement
 - c. Safety auditing methodologies and techniques

E.21 GROUND SERVICE EQUIPMENT - ON THE JOB TRAINING**HDL 4.1.6**

This course applies to personnel whose duties and responsibilities require the operation of ground service equipment (GSE). Instruction and approval will be given for each type of equipment as follows:

- i. Theory / Use
 - a. Controls (Function and Locations)
 - b. Emergency Stop (E-STOP)
 - c. Fluids
 - d. Hand Signals
 - e. Parking Brake
 - f. Ramp Safety
- ii. Practical Training
 - a. Aircraft Hook up / Parking
 - b. Operation of Controls
 - c. Disconnecting Procedures
 - d. Emergency Shutdown
 - e. Normal Shutdown
 - f. Driving on the AOA
 - g. GSE Start up
 - h. GSE Start up after E-STOP
- iii. Ground Service Equipment
 - a. Towbar
 - b. Tug / Baggage Tractor (GAS)
 - c. Tug / Baggage Tractor (ELECTRIC)
 - d. Unit Load Devices (ULD)
 - e. Ground Power Unit (GPU)
 - f. Air Conditioner Unit (ACU)
 - g. Air Start Unit (ASU)
 - h. Belt Loader
 - i. Potable Water (Truck / Gate)
 - j. Lavatory (Truck)
 - k. Passenger Stairs
 - l. K-Loader
 - m. Fuel Truck
 - n. Open Baggage Cart
 - o. Paymover / Pushback Tractor
 - p. Towbarless Pushback Tractor

Section: E

Training and Qualification

Revision: 6

Date: 10/01/2021

E.22 SUPERVISORY TRAINING

This training is applicable to personnel who are designated as Supervisors by the company.

i. Leading Yourself

- a. Career Management
- b. Ethics at Work
- c. Accountability
- d. Professionalism

ii. Leading Others

- a. Coaching and mentoring
- b. Diversity
- c. Feedback Essentials
- d. Global Collaboration
- e. Leading People
- f. Performance Appraisal
- g. Retaining Employees, motivation
- h. Team Creation
- i. Team Management and conflict resolution
- j. Drug Program - Impairment Recognition
- k. Disciplinary Process

iii. Leading the Business

- a. Budgeting
- b. Business Plan Development
- c. Customer Focus
- d. Decision Making, empowerment
- e. Innovation and Creativity
- f. Process Improvement
- g. Strategic Thinking
- h. Teamwork
- i. Safety Awareness
