

ULTRA AVIATION SERVICES, INC.

General Operations Manual

APPENDIX: 1

SAFETY & SECURITY BULLETIN (U-SMS-09)

Revision: Original

Date: 7/1/2015

Bulletin No: 16-006

Date: 5/Apr/16

SUBJECT: PROPER LIFTING TECHNIQUES

APPLICABLE TO: ALL ULTRA SERVICE AGENTS

WHEN LIFTING ALWAYS REMEMBER THE DO'S AND DON'TS

DO

- 1- LIFT AS A TEAM. Do lift bulky or heavy loads as a team. Doing so is smart and the safe way to work
- 2- TURN WITH LEGS. Do move your legs and feet when turning or lowering the load. Avoid twisting at your waist.
- 3- USE YOUR LEGS. Do lift the load using your powerful leg and buttocks muscles. Your feet should be wide apart, head and back upright. Keep abdominal muscles tight and the load in close
- 4- USE EQUIPMENT. Do use equipment like hand trucks or forklifts to do the heavy lifting. It's much less work and less risk of injury

DON'T

- 1- LIFT BULKY LOADS ALONE. Don't lift bulky or heavy loads alone. Doing so put great stress on your low back muscles and spine
- 2- TWIST WHEN LFTING. Don't twist when lifting, lowering or carrying any load as this increases your risk of back injury
- 3- USE YOUR BACK. Don't lift the load with your rear and high and your lead low. Use your leg muscles, not your weaker low back muscle
- 4- LIFT HEAVY LOADS. Don't lift heavy loads when you can use equipment. It is less work and less stress in your low back. USE THE BUDY system.

REMEMBER BEFORE ATTEMPTING TO LIFT ANY LOAD TESTED IT, SIZES CAN BE DECEIVING
