

APPENDIX: 1

SAFETY & SECURITY BULLETIN (U-SMS-09)

Revision: Original

Date: 7/1/2015

Bulletin No: 16-009

Date: 1/Sep/16

SUBJECT: PROPER LIFTING THECNQUES

APPLICABLE TO: ALL ULTRA SERVICE AGENTS

WHEN LIFTING ALWAYS REMEMBER THE DO'S AND DON'TS

DO

- 1- **LIFT AS A TEAM.** Do lift bulky or heavy loads as a team. Doing so is smart and the safe way to work
- 2- **TURN WITH LEGS.** Do move your legs and feet when turning or lowering the load. Avoid twisting at your waist.
- 3- **USE YOUR LEGS.** Do lift the load using your powerful leg and buttocks muscles. Your feet should be wide apart, head and back upright. Keep abdominal muscles tight and the load in close
- 4- **USE EQUIPMENT.** Do use equipment like hand trucks or forklifts to do the heavy lifting. It's much less work and less risk of injury
- 5- **USE BOTH ARMS and HANDS** when reaching for a load

DON'T

- 1- **LIFT BULKY LOADS ALONE.** Don't lift bulky or heavy loads alone. Doing so put great stress on your low back muscles and spine
- 2- **TWIST WHEN LFTING.** Don't twist when lifting, lowering or carrying any load as this increases your risk of back injury
- 3- **USE YOUR BACK.** Don't lift the load with your rear and high and your lead low. Use your leg muscles, not your weaker low back muscle
- 4- **LIFT HEAVY LOADS.** Don't lift heavy loads when you can use equipment. It is less work and less stress in your low back. **USE THE BUDY system.**
- 5- **REACH, PULL AND LIFT** using **ONLY** one arm/ hand

REMEMBER BEFORE ATTEMPTING TO LIFT ANY LOAD TESTED IT, SIZES CAN BE DECEIVING
