

**Bulletin No: 17-014**

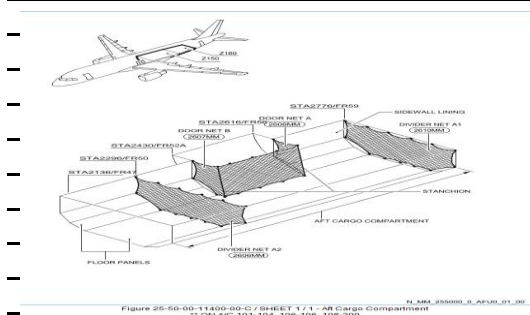

**Date:** 28/Nov/17

**SUBJECT:** RAMP procedures reminder

**APPLICABLE TO: ALL RAMP PERSONNEL**

When assign to work a flight using a bulk loaded aircraft such as Viva Colombia, XTRA, SWIFT, ARUBA, World Atlantic you must insure that

- |                                                                                                      |
|------------------------------------------------------------------------------------------------------|
| 1- No GSE that needs to mate with the aircraft does not touches the fuselage. They must leave 2" gap |
| 2- Make sure that all nets and or locks are set, even if the bin is empty                            |
| 3- Make sure that the 2' gap between the ceiling and the last bag are respected/ follow              |
| 4- YOU use a guide person when approaching the Aircraft with a piece of GSE                          |
| 5- YOU use the appropriate PPE                                                                       |
| 6- No GSE is inside the ERA, when marshalling in or pushing aircraft back. Including wheel chocks    |
