

Bulletin No: 19-009

Date: 5/Mar/19

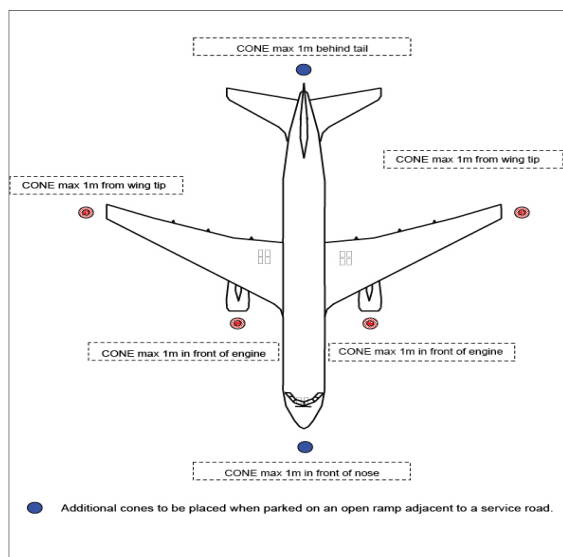

SUBJECT: RAMP SAFETY

APPLICABLE TO: ALL ULTRA Agents

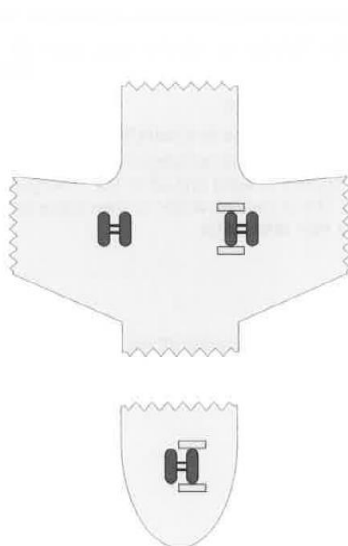

REMEMBER

When assign to meet and or dispatch an aircraft you must remember these simple rules

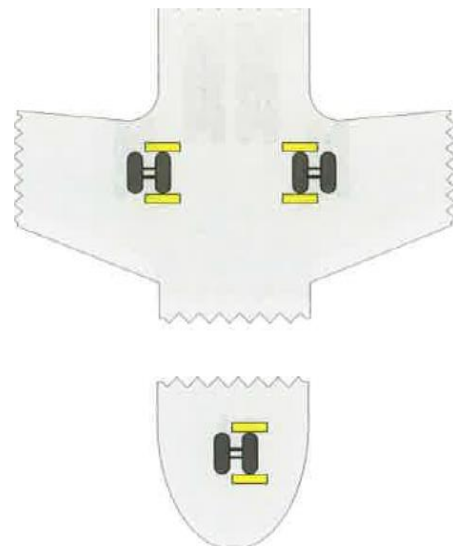

- 1- Make sure that you have in your possession your current MDAD ID, your AOA drivers permit and your Florida Drivers License
- 2- You bring all the necessary GSE for the operation. Cones, Chocks, GPU, belt loaders, ACU, etc.
- 3- You make sure that all GSE is outside the equipment restrain area (ERA), while the aircraft is in motion
- 4- When the operation requires you to position the GSE in the aircraft, make sure you perform the three safety stops and that you use a guide person
- 5- Position cones and chocks according to Airline/ UAS SOP's. Airline SOP prevails

Minimum cones for a two engine aircraft

Minimum chocks for a turn around flight

Minimum chock for a terminator / RON flight

BE safe your life and that of others might depend on it
