

APPENDIX: 1

SAFETY & SECURITY BULLETIN (U-SMS-09)

Revision: Original
Date: 7/1/2015

Bulletin No: 19-019

Date: 7-Nov-19

SUBJECT: ISAGO

APPLICABLE TO: RAMP FLIGHT COORDINATORS, SUPERVISORS AND LEADS

1- Performed by the Coordinator a safety walk around of the aircraft will be accomplished immediately after arrival and before departure, to discard any damage that has been caused to the aircraft before arriving or during the operation at MIA

2- Once beacon has been turn off and it is safe to enter the ERA, the Chocks will be placed first and after the plane is secure, then the cones will be placed.

3- Cones will not be placed directly underneath the tail and or wingtips. They must be positioned at least 1 meter (3 feet) away from the wing tip or the tail of the aircraft.

4- Lavatory and potable water services will not be conducted at the same time. The water services will be performed first then the lavatory. It is important that before starting the water service, the pump is activated and water is pumped out for 5 seconds, this would eliminate any possible contamination.

5- Instruct all agents in your crew that they must report any abnormality they see to the flight coordinator, lead and or supervisor no matter how small it might seem to be**SEE SOMETHING SAY SOMETHING.**

6 - If any Swift supervisor, advises the crew to load bags from another Charter and or to load irregular loads Oversize or Overweight, his/ her complete name will be written communicated thru the individual flight chats.

7- No aircraft will be allowed to move, in or out from a gate, remote position, hangar without the use of wing walkers, using the appropriate day or night wands.

8- Any GSE that needs to mate with the aircraft,(belt loader, K loaders, PSU, lavatory, water and cabin services truck) MUST use a guide person and perform the three brake safety stops when approaching the aircraft.

9- An accurate hours of usage control of the GSE will be reported by the Flight Coordinator, Supervisors and or leads that hooks up a piece of GSE (GPU, ACU) to an aircraft

Remember, when in doubt DO NOT ASSUME, ASK your manager or your training department

Continue doing the good job you are doing

SAFETY FIRST

Do not become an statistic
